Mastercool's 4-Way Digital Manifold Recording Function:

- Record and store data directly into the manifold memory
- Record up to 24 hours of data or 15 jobs before having to download
- Download data at a rate 115 kb per second (24 hrs of data = approx. 15 min of download time)
- Easily view data using Mastercool's Data Logger Application

MASTERCOOL DATA LOGGER APPLICATION

- Display data in "real time" using a USB connection, computer and software
- Platform: Windows 2000, XP and Windows Vista.
- Log Customer Name, Date and Technician's Name
- Recorder/Cursor Function Features
 - (1) Recorder TIME command. Record in intervals of 5, 15 min, 1, 4, 8 and 24 hrs.
 - (2) Recorder ON/OFF command.
 - (3) ZOOM: NORMAL, 5X or 10X. Use the zoom option to view specific data points of interest.
 - (4) The TIME-LINE measures the selected recording time. Moving the cursor along the timeline easily displays specific plot points.
- The Data Logger program uses the Units information contained in each data bit on the manifold and displays these units on the screen.
- Display Function Features
 - (1) Display ALL command. This enables all parameters of the Digital Manifold to be displayed simultaneously. As the line functions propagate across the screen, the "real-time" data will also be displayed digitally.
 - (2) Monitor specific functions of interest. The Data Logger continues to record all the functions in the background, regardless of how many individual functions are being displayed.
 - (3) Display DEEP VACUUM ONLY command. This enables only the deep vacuum readings to be displayed on the screen.
 - (4) View ANALOG GAUGES function enables the user to represent the Digital Manifold data in the form of high and low pressure analog gauges.
